Morehead City - Raleigh - Charlotte

Welcome to Coastal Carolina Supply

Operating since 1982, Coastal Carolina Supply specializes in pool automation and chemical supply for aquatic facilities. Headquartered on North Carolina's Crystal Coast, the company is the largest supplier of liquid chlorine in the Mid-Atlantic and maintains offices and storage facilities in Morehead City, Raleigh, and Charlotte, NC. These facilities enable CCS to offer unparalleled service to an expanding customer base which includes colleges and universities, federal, state, and local

municipal facilities, YMCA's, health clubs, country clubs, pool management companies, pool supply companies, membership pools, subdivision pools, and many other large pools requiring health department inspection.

What We Do:

- ❑ Supply Liquid Chlorine and other chemicals vital to successful water management
- ❑ Supply, Install, and Service Chemical Automation Equipment
- ❑ Operate Pools and Spas (Under Management Agreement)

What We Don't Do:

- ❑ Provide Staffing (lifeguards, attendants, etc...)
- ❑ Install, Repair, or Maintain Mechanical Systems
- ❑ Service or Sell to Home Pools

Liquid Chlorine

The Benefits of Sodium Hypochlorite

Long recognized as the most effective disinfectant against all known pathogenic bacteria, fungi, and viruses, **liquid chlorine** is used extensively in water treatment, both as a disinfectant for municipal drinking water and for odor control in sewage treatment. For use in swimming pools, liquid chlorine has been proven more cost-effective, safer, and easier to use than any other form of sanitizer available. Switching to liquid chlorine can save pool operators 40% or more on their annual chemical expenses. Liquid chlorine is the best choice for use in swimming pools because it is:

- ❑ **Economical**
 - About half the cost of other chlorine forms
 - Bulk delivered for greater savings
 - No charge for storage containers or setup
- ❑ **Safe**
 - Non-flammable and non-fuming
 - No handling required
 - No mixing required
- ❑ **Clean**
 - Leaves no residue
 - Offers unparalleled clarity
- ❑ **Complete**
 - One source for sanitizing and shocking
- ❑ **Easy-to-Use**
 - Can be injected with timer pump or used with full automation system

Controller Program

Automatic Water Treatment for Pools and Spas

Our controller automatically maintains the chlorine residual and the pH level in your pool or spa. The controller's highly advanced sensors constantly monitor water conditions and activate the chemical feeds only when necessary, avoiding the over feeds common in manual feed systems and the resultant chemical waste and water imbalance. Our controller relieves you of

constant water maintenance and ensures that your pool water continuously meets health department standards. Automating your pool offers the following benefits:

- ❑ **Superior Water Quality**—automating provides continual chemical maintenance, eliminates bather complaints, and assures you of the highest quality water for your bathers.
- ❑ **Reduced Labor**—pool operators need make only the minimum balance checks required by the local health department.
- ❑ **Chemical Savings**—Because of its efficient use of chemicals, automation can reduce your chemical expenditures by 15–40%.
- ❑ **Safety**—Automating your pool reduces your staff's involvement with hazardous chemicals and reduces the risk of chemical-related injuries.
- ❑ **Maintenance Savings**—Balanced water extends the life of impellers, ladders, heater coils, and even plaster.
- ❑ **Spring Restart Savings**—An automated pool can be easily maintained through the winter and is less costly than the draining and refilling involved in spring startup. Maintaining your pool through the off-season also means an end to power washing, acid washing, and repainting.
- ❑ **Peace of Mind**—Unsanitized pool water is not only unattractive—it can also be a liability. Automating your pool reduces this risk by constantly maintaining your pool's sanitizer level.

2019 Automated Controller and Feed Systems

Automated Controller Rental Cost

Annual Rental.....\$1,250.00

Installation per Unit.....\$250.00

- Full Service includes full controller board and all wear parts and service
- Periodic service checks on controller function and performance
- Controller board updated annually
- Daily operation and water chemistry checks are the responsibility of facility
- Parts can be left at customers request for immediate repairs
- Installation includes complete controller board and all tubing, fittings and initial calibration

Chemical Management System

Annual Charge (Billed Monthly) \$2,050.00 / \$175.50

Installation and Facility Analysis \$350.00

Our Chemical Management System includes the lease of 1 full controller board and biweekly complete water chemistry analysis using our WaterLink SpinLab. (Tests are conducted monthly during the off season if circulation system is operating.) Tests are logged into our database and results are shared electronically with the facility’s designated director. The SpinLab analysis will provide detailed information and directions of all necessary chemical adjustments to ensure optimal water quality. The biweekly analysis will provide an electronic profile of your facilities water chemistry history. This information proves valuable in assisting the pool operating in avoided unnecessary closures due to chemistry oversights; as well as providing additional information to pool inspectors.

2019 Automated Controller and Feed Systems

<u>Purchase of Refurbished Controller Unit</u>	<u>Cost</u>
Purchase of Newly Refurbished Unit	\$850.00
Installation	\$250.00

- Refurbished Controller Unit includes full board with 2 replacement tubes.
- Control Unit, Feeder Pumps, and Pressure Switch are warranted for 30 days from installation.
- Installation includes full controller board mounting, and all necessary tubing, and initial calibration.

**Purchase of refurbished equipment is based on availability. Limited quantities are available.
 *All equipment rental options are contingent on using Coastal Carolina Supply as the chemical supplier.
 Service call rates are \$95.00 per hour (one hour minimum), plus parts.

New Controller Unit – Aquasol WTC Dual Display Unit (ORP/pH)

Purchase Price	\$2,850.00
Controller Board Assembly	\$75.00
Installation	\$250.00

- New controller purchase includes control unit, pressure switch, test cell, probes and 2 feeder pumps.
- Controller Board Assembly includes all parts and fittings and assembly board.
- Installation includes full controller board mounting, and all necessary tubing, and initial calibration.
- All service and repairs after installation are billed accordingly.

2019 Automated Controller and Feed Systems

Stenner Adjustable Rate Feed Pump for Liquid Chlorine

<u>Adjustable Rate Feed Pump</u>	<u>Cost</u>
Adjustable Rate Feed Pump (Purchase)	\$495.00
Adjustable Rate Feed Pump (Annual Rental)	\$195.00
Safety Pressure Switch (Purchase)	\$155.00
Safety Pressure Switch (Annual Rental)	\$50.00
Installation	\$150.00

- The output is determined by three factors; the rpm of the motor gears, the setting on the feed rate control and the pump tube size. The feed rate control has an external dial ring that is labeled L to 10 offering an adjustable output range from 5% to 100% in 2.5% increments.
- Easy and fast tube replacement without tools with the QuickPro® pump head.
- The pump is built with three detachable components; the motor, feed rate control and the pump head that can be separated without tools.
- Pressure Switch is required to ensure feed pump turns off if circulation of the pool water is stopped
